Q—How much silver is in old U.S. silver dollars? Are my coins worth more as collectibles or for worth more as their silver content?

T.E., Chicago

A—U.S. dollars minted for circulation between 1840 and 1935 each contain .77 ounce of silver, worth about \$4 at current metal

prices.

Your coins probably would fetch \$10 or more—perhaps much more—as collector items; prices would depend on the date, mint mark and condition of each coin.
